

HACK

MIT-WPU'25

26th-28th MARCH 2025

ले छलांग

ONE HACKATHON. FOURTEEN TRACKS.
MILLION PROBLEMS. BILLION MINDS.

MIT WORLD PEACE UNIVERSITY

MIT World Peace University (MIT-WPU), Pune, was founded by visionary educationist Prof. Dr. Vishwanath D. Karad to provide quality higher education. Beginning with Maharashtra Institute of Technology (MIT) in 1983, it established itself in engineering and later expanded into multiple disciplines. Today, the MIT Group has grown to 5 universities and 80 institutions, serving over 70,000 students across Maharashtra.

The transformation into Dr. Vishwanath Karad MIT-WPU marked a bold step toward nurturing impactful students through inclusion and innovation. The university integrates advanced, multidimensional learning methods to promote education for harmony and progress.

MIT-WPU now offers diverse programs, including Engineering, Medicine, Pharmacy, Design, Management, and more. With a strong commitment to excellence, it continues shaping future leaders across various professional fields.

The foundation of MAEER'S MIT Group of Institutions rests firmly on the philosophy exposed by Swami Vivekananda who said, "The union of Science and Religion alone will bring peace and harmony to mankind."

MIT WPU DEMOGRAPHICS

The inception of MIT-World Peace University in Pune is the result of a steadfast commitment to providing exceptional education to ambitious individuals seeking advanced professional knowledge.

This noble endeavour is led by the visionary educator, Revered Prof. Dr. Vishwanath D. Karad. Having established the Maharashtra Institute of Technology (MIT) in 1983 and achieving distinction in the competitive field of engineering, MIT has progressively expanded into various academic domains.

It's a matter of great pride that the MIT Group of Institutions & Universities has evolved into five universities and eighty institutions, housing a dedicated faculty and staff of over 10,000 members. Their collective mission is to cater to the educational needs of more than 70,000 students across multiple universities in Maharashtra

The foundation of MAEER's MIT Group of Institutions believes and follows in the philosophy articulated by Swami Vivekananda, who proclaimed, "The convergence of science and religion alone shall bestow peace upon humanity."

FOUNDER'S MESSAGE

VISHWADHARMI

REV. PROF. DR. VISHWANATH D. KARAD

Founder & Chief Patron, MAEERS' MIT Pune,
UNESCO Chair holder, President, MIT-WPU,
Pune, BHARAT

At MIT World Peace University, as we embark on the transformative journey towards a harmonious and enlightened world, guided by the principles of 'tyaag' and 'samarpan', let us remember that our collective efforts at HACK MIT-WPU 2025 embody the essence of discipline, dedication, and devotion.

Just as we strive to nurture an Aatmanirbhar Bharat and envision Bharat as a Vishwaguru, our participation in this event reflects our commitment to shaping a better tomorrow through innovation, collaboration, and the union of science and spirituality.

In the spirit of unity and progress, let us embrace the synergy between our body, mind and spirit, recognizing that this convergence is the cornerstone of cultivating harmony and unity among all mankind. As we engage in this event, let us be inspired by the vision of Swami Vivekananda and the teachings of Revered Prof. Dr. Vishwanath Karad, paving the way for a more enlightened society where positive global change and world peace are our guiding principles.

Together, as a community of learners, thinkers, and visionaries, let us strive to make a lasting impact at HACK MIT-WPU 2025, knowing that our actions today will shape the world tomorrow. With humility and gratitude, let us approach this event with a sense of purpose and a commitment to excellence, for it is through our collective endeavours that we can truly make a difference in the world.

DR. RAHUL V. KARAD

Managing Trustee and Executive President,
MAEER's MIT Pune Executive President,
MITWPU, Pune, Bharat and Chief Initiator
MIT-SOG.

At MIT World Peace University, as we embark on the transformative journey towards a harmonious and enlightened world, guided by the principles of 'tyaag' and 'samarpan', let us remember that our collective efforts at HACK MIT-WPU 2025 embody the essence of discipline, dedication, and devotion.

Just as we strive to nurture an Aatmanirbhar Bharat and envision Bharat as a Vishwaguru , our participation in this event reflects our commitment to shaping a better tomorrow through innovation , collaboration , and the union of science and spirituality.

In the spirit of unity and progress, let us embrace the synergy between our body, mind and spirit, recognizing that this convergence is the cornerstone of cultivating harmony and unity among all mankind. As we engage in this event, let us be inspired by the vision of Swami Vivekanada and the teachings of Revered Prof. Dr. Vishwanath Karad, paving the way for a more enlightened society where positive global change and world peace are our guiding principles.

Together, as a community of learners, thinkers, and visionaries, let us strive to make a lasting impact at HACK MIT-WPU 2025, knowing that our actions today will shape the world tomorrow. With humility and gratitude, let us approach this event with a sense of purpose and a commitment to excellence, for it is through our collective endeavours that we can truly make a difference in the world.

DR. R. M. CHITNIS

Chief Mentor
HACK MIT-WPU 2025,
Vice Chancellor

HackMIT-WPU 2025, our annual hackathon, is a gateway to transforming your ideas into tangible realities. We aim to ignite potential and equip the students with the necessary skills to become a future leader and entrepreneur. Through collaborative teamwork, expert guidance, and a stimulating environment, the students will be challenged to think critically, develop innovative solutions, and translate your vision into a concrete product. HackMIT-WPU 2025 is not just a competition; it's a springboard for the entrepreneurial journey, equipping the students with the skills and confidence to become a leader who shapes the future.

DR. SANJAY KAMTEKAR

Chief Academic Officer,
MIT-WPU

Welcome to the epitome of creativity and innovation - the MIT-WPU Hackathon! In this exciting environment where sleep is rare and caffeine is our companion, we will witness groundbreaking ideas that could shape the future. The essence of a hackathon is not just in the code we write or the prototypes we build, but in collaboration, innovation, and determination to solve the unsolvable. Dive into your projects with ethical innovation in mind, ensuring your solutions benefit society. Your ideas, whether you're a seasoned hacker or a newcomer, have the power to disrupt industries and change lives. This hackathon could be the start of a revolution that redefines the future. Thank you and may the best ideas win!

THOUGHTS OF CONVENERS

DR. MILIND PANDE

Chief Convenor
HACK MIT-WPU 2025,
Pro Vice Chancellor

At MIT World Peace University, as we embark on the transformative journey towards a harmonious and enlightened world, guided by the principles of 'tyaag' and 'samarpan', let us remember that our collective efforts at HACK MIT-WPU 2025 embody the essence of discipline, dedication, and devotion.

Just as we strive to nurture an Aatmanirbhar Bharat and envision Bharat as a Vishwaguru, our participation in this event reflects our commitment to shaping a better tomorrow through innovation, collaboration, and the union of science and spirituality.

In the spirit of unity and progress, let us embrace the synergy between our body, mind and spirit, recognizing that this convergence is the cornerstone of cultivating harmony and unity among all mankind. As we engage in this event, let us be inspired by the vision of Swami Vivekananda and the teachings of Reverend Prof. Dr. Vishwanath Karad, paving the way for a more enlightened society where positive global change and world peace are our guiding principles.

Together, as a community of learners, thinkers, and visionaries, let us strive to make a lasting impact at HACK MIT-WPU 2025, knowing that our actions today will shape the world tomorrow. With humility and gratitude, let us approach this event with a sense of purpose and a commitment to excellence, for it is through our collective endeavours that we can truly make a difference in the world.

DR. ASHOK JOSHI

Founder, Microlin LLC, Salt Lake City, USA

Dr. Ashok Joshi began his career as an engineer at Ceramatec Inc., USA, in 1984 and became CEO in 1996. He navigated a potential sell-off due to a no-confidence motion and, in 1999, became the owner of Ceramatec Inc. Under his leadership, the company experienced a 300% growth over 8 years and was eventually acquired by CoorsTek, the largest technical ceramics company globally.

A well-recognized innovator and high-technology entrepreneur, Dr. Joshi has developed several technologies in the Energy, Environmental, and Biotech fields. He is an inventor of more than 130 issued US patents and has over 40 pending US Patents. He is an invited speaker to various international conferences including NATO Conference on Advanced Battery Technology – 1972. He is a recipient of many prestigious awards for his contributions including : Maxell Foundation Lifetime Achievement Award- 2014, Pioneers of Progress Award for Science & Technology, Days of '47 State of Utah – 2014 Utah Genius Award – 2012; Industrial Research Institute Achievement Award – 2009 and many more.

With the belief that “giving back brings the greatest happiness,” he began his social work in rural India, initially supporting 21 schools and later building schools for mentally challenged children, including one in Wai. He has funded trips for students in Salt Lake City to assist in schools and villages, helping women start small businesses with microloans. Dr. Joshi serves on various boards, including those of Westminster College, Salt Lake Community College, and the National Industrial Research Institute, and actively mentors college students.

CONCEPT NOTE

Innovation facilitates growth by encouraging critical thinking, problem-solving, and creativity. Through an entrepreneurial mindset, students learn to navigate uncertainty, collaborate effectively, and adapt to change, promoting resilience and lifelong learning.

The importance of innovation stems from its natural ability to drive advancement and change in all sectors of society. Societies can employ innovation to build a better future for generations to come, embrace new possibilities, and adjust to changing demands. By consistently pushing the envelope of what is feasible, it stimulates economic development, competitiveness, and sustainability.

To achieve these objectives HACK MIT-WPU has created an environment that supports a creative culture, opportunities for collaboration and networking to acquire industry-specific experience, availability of necessary resources, and mentorship along with guidance are required.

HACK MIT-WPU 2025 will proactively establish the importance and culture of innovation across various sectors and industries. The core objective is to discuss, encourage, inspire, and provide a space for students to express and explore their innovative ideas to think and develop into innovators and entrepreneurs.

HACKATHON SECRETARIAT

The Hackathon Secretariat is the central organizing team that drives some of the most prestigious and large-scale events at MIT-WPU. With a legacy of executing high-impact flagship events, including NSRTC, World Parliament, and Hack MIT-WPU 2024, the Secretariat is the powerhouse behind successful, innovation-driven experiences.

As the core coordinating body, the Secretariat ensures seamless planning, execution, and management of events that push boundaries in technology, entrepreneurship, and global discourse. Through strategic leadership, meticulous planning, and collaboration with university clubs and industry leaders, the team consistently delivers transformative events that inspire students, foster innovation, and position MIT-WPU as a leader in academic excellence.

For HACK MIT-WPU 2025, the Secretariat is taking it a step further by expanding the event to a university-wide scale, integrating diverse clubs and disciplines to create a hackathon like never before. The Hackathon Secretariat aims to create a benchmark event, offering all university clubs equal opportunities for hands-on experience in management and organization. This expansion aims to create a collaborative ecosystem where clubs can enhance their organizational capabilities, work alongside experienced mentors, and develop leadership and problem-solving skills that will prepare them for future professional endeavors. Join us as we redefine innovation, collaboration, and impact at HACK MIT-WPU 2025!

WHAT IS HACK MIT?

HACK MIT-WPU 2025 is a platform curated for students to explore an array of options and propel in their expertise. It is not merely a technothon but consists of a good blend of various challenges and problem statements revolving around the technical, the business, the media, the pharmaceutical and many more worlds! Ranging across all schools - from Engineering to Business and Management.

At HACK MIT-WPU 2025, participants will have the chance to work with new technologies, develop innovative solutions to real-world problems, and present their ideas to a panel of judges. It includes time-bound challenges where diverse teams come together to design, build, and present solutions to real-world problems. HACK MIT WPU 2025 comes bearing with new excitements, new tracks and brand-new energy! HACK MIT WPU 2025, is not restricted for one but open to all the student clubs present at MIT World Peace University.

It is a central event which includes more electrifying and thrilling tracks open to students of all the departments like Visualathon, Cosmotron, DataQuest, Case-X, Women entrepreneurship, HackA/thon and many more.

ले छलांग

HACKMIT-WPU is a platform where you can transform your ideas into implementations, take your mind to the market, and your ideas from paper to product! This year HACKMIT-WPU is back with a new, energetic, and spirited motto, 'ले छलांग' i.e. the leap of faith, that would help you break free from the limitations holding you back towards the life you've always dreamed of! 'Le Challang', is an invitation to challenge your beliefs, step out of your comfort zone and transform your world from within. We often find ourselves standing at the edge of new possibilities, our hearts pounding, looking into the unknown, afraid to take that crucial 'leap of faith'.

The world is waiting for you to step forward, not just to make your mark, but to make a meaningful difference for yourself and the world around you. So, are you ready to take this leap of faith? To dive in and discover the incredible power within you? Le Challang isn't about finding motivation instead it's a powerful movement that inspires change and ignites passion!

WHY PARTICIPATE IN HACKMIT-WPU 2025?

1) Skill Development: Participants will develop and enhance essential skills like:

Creative Thinking: Challenging conventional thinking to generate novel ideas.

Problem-solving: Analysing problems and developing effective solutions.

Critical Thinking: Evaluating ideas and refining solutions through analysis.

Communication: Effectively communicating ideas verbally and in writing.

Teamwork and Collaboration: Learning to work effectively in a group, share ideas, negotiate, and resolve conflicts.

Time Management: Managing time effectively to achieve goals within a limited timeframe.

Presentation Skills: Structuring and delivering compelling presentations.

2) Showcasing Potential:

Highlighting the innovation potential.

3) Intellectual Property Creation: Developing new technologies, products, or services.

4) Community Building:

Connecting with experts and companies to build relationships beyond the event.

5) Career Advancement:

Igniting careers in technology and providing a launching pad for professional journeys.

6) Receive startup funding and soft loans, Gain Recognition, Awards and Prizes, Publicity and Exposure, Personal Satisfaction

7) Fostered Innovation:

Freely sharing ideas and collaborating to create innovative solutions.

8) Expanded Network: Participants will connect with individuals from diverse backgrounds and industries:

Collaboration with MIT-TBI: Provision of workspace.

Industry Professionals: Gaining insights from experienced mentors and judges.

Peers with Shared Interests: Connecting with like-minded individuals.

IDEATHON

Description: Ideathon offers a platform for participants to present their innovative ideas and propose solutions without the need for a physical prototype. It encourages creativity and problem solving skills.

Appeal to Students: Ideal for creative thinkers and visionaries, Ideathon provides an opportunity to showcase unique ideas and solutions, fostering innovation and imagination.

Appeal to faculty: This track is specially dedicated to our esteemed faculties to participate and encourage innovation and entrepreneurship. It is a wonderful opportunity to showcase your innovative ideas, research projects, or startup ideas. This dedicated track allows faculty to explore cutting-edge technologies, conduct applied research, and develop innovative solutions to real-world challenges.

WORKATHON

Description: Workathon challenges participants to propose solutions with software, hardware, experiments, software simulations, or case studies. It emphasises practical application and innovation.

Appeal to Students: Suited for those interested in hands-on projects and technical solutions, Workathon allows participants to explore real-world problems and develop tangible solutions using various tools and methodologies.

PHARMATHON

Description: Pharmathon focuses on proposing innovative solutions in pharmaceutical sciences and bio-related fields. It encourages interdisciplinary collaboration and research in healthcare.

Appeal to Students: Designed for students interested in healthcare innovation and biosciences, this track offers a platform to address challenges in pharmaceuticals and biology through research-driven solutions.

CAPTURE THE FLAG

Description: Capture the Flag (CTF) challenges participants in cybersecurity by testing skills in cryptography, reverse engineering, web exploitation, and more. It will simulate real-world scenarios to enhance collaboration and critical thinking.

Appeal to Students: Ideal for cybersecurity enthusiasts and ethical hackers, CTF offers hands-on experience in tackling cyber threats, identifying vulnerabilities, and honing technical skills through engaging challenges.

Description: Biothon brings young medical and engineering talent together to identify issues, problems, and solutions for affordable healthcare ecosystems, medical equipment, and infrastructure. Medical and engineering students will collaborate using 3D technology and simulation to solve healthcare challenges.

Appeal to Students: This track offers a unique chance for those passionate about healthcare innovation to develop affordable, accessible solutions through engineering and medical collaboration.

POLYTECHNICAL

Description: The Polytechnic Track at HACKMIT-WPU 2025 is designed to foster and nurture entrepreneurial skills and aptitude for diploma students. This track encourages participants to leverage their technical skills in engineering, hardware, and software development to create groundbreaking solutions that address practical industry challenges. Whether you're interested in robotics, IoT, AI, smart manufacturing, or sustainable engineering, this track encourages you to prototype and test your ideas collaboratively.

Appeal to students: This track is designed for hands-on innovators, makers, and problem-solvers eager to bridge the gap between theory and real-world application.

COSMOTRON

Description: Cosmotron track invites participants to tackle challenges in space sciences, including astronomy, astrophysics, satellite technology, and space exploration. Students will design innovative solutions like AI-driven celestial data analysis and space debris management. The goal is to foster creativity and technical expertise while shaping the future of space innovation.

Appeal to students: A must for space enthusiasts, engineers, and researchers passionate about exploring beyond Earth.

+ + + + +
+ + + + +
+ + + + +

WOMEN ENTREPRENEURSHIP

Description: Women entrepreneurship is a track dedicated to empowering women entrepreneurs, fostering innovative business ideas, and providing mentorship for female-led startups.

Appeal to students: Ideal for aspiring female entrepreneurs and leaders looking to create a meaningful impact in the business world.

DESIGNOVATION

Description: Designovation is a high-energy, one-day design hackathon where designers tackle time-bound challenges with creativity and innovation. Participants will ideate, prototype, and present functional, user-centered, and sustainable solutions while integrating cutting-edge technologies. This intense sprint fosters collaboration, learning, and the practical application of design thinking.

Appeal to students : Designovation is a high-energy hackathon where students solve real-world design challenges, learn from experts, and showcase their creativity.

+ + + + +
+ + + + +
+ + + + +

HACK-AI-THON

Description: HACK-AI-THON focuses on building AI driven solutions using large language models (LLMs), external APIs, and custom-developed models. Participants will gain hands-on experience in data processing, machine learning, and deployment to create scalable AI applications. The goal is to skills under tight deadlines, preparing them for modern tech careers.

Appeal to students: Designed for students learning data science, analysis, and engineers passionate about big data and analytics.

Description: Participants will leverage (AWS) Amazon Web Service cloud computing technologies to develop scalable and efficient solutions for various industry challenges.

Appeal to students: A great opportunity for cloud computing enthusiasts and developers to enhance their skills in AWS technologies.

DATA QUEST

Description: Data Quest is a two-day hackathon where participants tackle real-world problems using curated datasets. It challenges teams to innovate, prototype solutions, and showcase machine learning skills under tight deadlines, preparing them for modern tech careers. It's a unique opportunity to experience real-world data science problems in a competitive environment.

Appeal to students: Designed for students learning data science, analysis, and engineers passionate about big data and analytics

CO-CREATION

Description: The Co-Creation track brings diverse individuals together to collaborate and solve real world challenges through innovative teamwork. By merging different perspectives, participants develop impactful solutions for a better future.

Student Appeal: This track is perfect for students who enjoy teamwork and innovation. Enhances creativity, leadership, and problem-solving skills. Participants can collaborate, network, and gain hands on experience in interdisciplinary projects.

BUSINESS ANALYTICS

Description: The Business Analytics track focuses on using data and analytical tools to solve business problems and enhance decision-making. It combines technical skills like data visualization, predictive modeling, and statistical analysis with business knowledge to identify trends, optimize operations, and forecast outcomes. This track is widely applied in industries such as marketing, finance, healthcare, and supply chain management.

Appeal to students: Ideal for Participants interested in both technical expertise and strategic planning

EXPIIENCE ZONE

SKYCRAPERS

It is rightly said by Albert Einstein, “Logic will take you from A to B. Imagination will take you everywhere”. Skyscraper is an activity in which the students must put their engineering skills to test! They must compete, create and crush the challenge. It is open for final year students and other students are also encouraged to participate. The goal of the activity is to construct the strongest bridge possible with 100 Popsicle sticks and white school glue provided in the kits. The bridge

must span a 500 mm gap with a maximum height of 300mm, the deck of your bridge must also have a clear path, 50 mm wide and 75mm high for the test apparatus. The design and construction of the bridge is left up to the competitor. This activity promotes STEM learning, creativity, problem-solving, teamwork, and structural engineering principles. Remember, “Your limitation – It’s only your imagination.”

LASER SHOT

Laser Shot challenge is where, precision meets engineering! The Laser Shot event involves teams competing to build a model that accurately directs a laser beam to hit a specified target. This event includes two rounds, design round and test round. In the initial phase teams draw a box number that assigns them specific materials and a problem statement related to the principles of optics, particularly using mirror and lens formulas. They are given a time limit to construct their models, which must adhere to certain target details and possible restrictions. Teams that successfully complete their models within the allotted time qualify for the test round.

This event not only emphasizes teamwork and creativity but also encourages participants to apply fundamental principles of physics, particularly those related to lasers, optics, and engineering design.

MADE IN MIT-WPU PAVILION

AR / VR

Augmented reality (AR) and virtual reality (VR) are two innovative technologies that transform user experiences by altering perceptions of reality. AR enhances the real world by overlaying digital information—such as images, sounds, and sensory inputs—onto the user's environment in real time. In contrast, VR immerses users in a completely simulated environment that replaces their physical surroundings. This integration is achieved through devices like smartphones, tablets, headsets and goggles where the user immerses itself in 3D virtual world and interacts with both physics and digital world while having a sense of presence and realism as well. Both AR and VR are rapidly evolving technologies with significant potential across various industries, including healthcare, education, and entertainment. Come join with us and experience this mesmerising world of technology at the pavilion of MIT-WPU.

FINAL YEAR PROJECT

The Final-Year Projects Showcase offers 4th year students a platform to present their innovative projects across electronics, robotics, software, civil engineering and many more departments. The event aims to inspire younger students, provide guidance on final-year projects, and offer hands-on exposure through live demonstrations, project posters, and interactive exhibits. Attendees can engage in Q&A sessions, networking opportunities, and discussions with experts, while a panel of judges evaluates projects based on innovation, presentation, and functionality.

This showcase is a celebration of creativity, problem-solving, and engineering excellence! The event features live demos, interactive exhibits, and project posters, giving younger students valuable insights into final-year experiences.

MAKE IN MIT-WPU PAVILLION

The 'Made in MIT-WPU Pavilion' is a dynamic showcase of creativity, innovation, and technical excellence, brought to life by the talented students clubs of Dr. Vishwanath Karad MIT World Peace University, Pune. This vibrant space brings together student clubs from across the university, providing a platform to highlight their achievements, projects, and groundbreaking endeavours.

Attendees gain valuable insights into the diverse initiatives led by these clubs, fostering exposure to ongoing developments, new perspectives, and opportunities to discover their passions. The pavilion serves as a hub of inspiration and collaboration, where attendees can engage with like-minded individuals, exchange ideas, and explore emerging trends. Made in MIT-WPU Pavilion embodies the university's unwavering commitment to innovation and entrepreneurship, leaving visitors inspired by the potential of technology and their applications to shape a better future.

Showcasing innovations like the electric Formula Student car by Acceleracers Electric, the fixed-wing UAV by The SkyTroopers, and the hexacopter by Team Phoenix, the pavillion was a hive of activity. Projects addressing societal issues, such as COVID-19 detection and women's safety bands, were also featured. Advanced technologies, including image recognition software for the visually impaired and machine learning for cancer prediction, captivated attendees.
